*Broadcast feeds of Los Angeles and New York networks are available only to subscribers who cannot receive, through the use of a conventional stationary, outdoor rooftop receiving antenna, an over-the-air signal of a primary network station affiliated with that network of grade B intensity as defined by the Federal Communications Commission. In select markets, DIRECTV offers local channels via the DIRECTV System or the DIRECTV Multi-Satellite System. Eligibility for local channels based on service address within certain designated market areas as defined by Nielsen Media Research, Inc. In some areas served by members or affiliates of the National Rural Telecommunications Cooperative ("NRTC") local channels may be available from DIRECTV rather than the NRTC member or affiliate. **Subject to blackout restrictions. The DIRECTV System has a "locks and limits" feature which allows you to restrict access to movies based on the MPAA rating system, or block the viewing of entire channels. Hardware and programming sold separately. Programming, pricing, terms and conditions subject to change. Receipt of DIRECTV programming is subject to the terms of the DIRECTV Customer Agreement; a copy is provided at DIRECTV.com and in your first bill. In some areas, programming may be provided by the members or affiliates of the National Rural Telecommunications Cooperative. In these areas, pricing and programming may differ from that described above. Equipment specifications and programming options vary in Alaska and Hawaii.
